HP Ink User Guide

HP Versatile Black Cartridge

HP Versatile Black ink cartridge achieves high-speed printing while preserving superior print quality.

Versatile ink is fast drying and can handle high printing speeds on both porous and coated media. This ink offers a solution for a variety of printing operations and applications.

Features

- Faster dry times, which results into faster production, higher output, and lower cost.
- Higher production and faster printing on both porous and coated media, without the need to change inks.
- Sharp, rich, black text and high-quality spot color on coated paper in just a single pass, without transfer and without sacrificing speed.

Applications

The HP Versatile Black ink cartridge work in conjunction with **Buskro Apollo** technology and offer a solution for a variety of printing operations which are especially suited for mail addressing applications, such as:

- Personalized addressing and direct-mail messaging
- Forms and catalogs
- Barcodes
- Statements and bills
- Lottery and gaming tickets

* Spot colors also available in Red, Blue, Green

HP 45A 10 Pack

Simplified packaging reduces shipping costs as well as handling and waste in a production environment.

HP 45A 10 Pack delivers greater value through increased ease and efficiency. The HP 45A 10-pack offers proven Original HP 45A industrial inks that delivers crisp black text on porous media.

Features

- Water- and smudge-resistant—and ideal for porous media
- Good balance of optical density and decap time
- Excellent readability on bar codes and package coding
- Easy-to-open and cost-effective bulk packaging
- Faster ink replacement times

Miro

Miro inkjet cartridges use an innovative solvent-based pigment ink formulation widely used for industrial printing applications such as mail addressing and package coding.

Miro successfully prints on a variety of glossy substrates delivering excellent universal coverage for a wide variety of print jobs.

Features

- Innovative solvent-based pigment ink- ideal for; aqueous acrylic overcoated stock, PVC, foil, and other glossy substrates.
- Provides longer decap times.
- High resolutions (45inch/sec., 600dpi x 300dpi).

Apollo Ink Delivery System

The Apollo Ink Delivery System combines all the great features of HP's proven inks with a robust and flexible bulk ink delivery system designed to meet the needs of high-volume printing applications.

This Ink Delivery System provides users with minimal operator intervention and deliver superior print quality on a wide variety of both coated and uncoated media.

- Large 350ml ink cartridges mean fewer operator interventions.
- Advanced electronic functions enable designers to build in ink-level monitors and signals for virtually uninterrupted printing during longer print runs.
- Printheads and ink cartridges can be changed independently, minimizing running costs.
- Ink cartridges that can be hot swapped, easy-to-replace printheads, and highly reliable connectors make for a robust system with very high uptime.
- Modular design enables multiple configurations of printheads and ink cartridges to achieve a variety of print swaths.
- Available in only Miro and Versatile Black.
